

Skills for Small Business

The Skills for Small Business targets businesses with fewer than 100 employees and provides training for full-time employees. Up to \$1,450 for tuition and fees per new hire and up to \$725.00 for tuition and fees per incumbent employee. Training must be selected from courses offered by a Texas public community/technical college or the Texas Engineering Extension Service. The program is in partnership with the Office of the Governor to further establish Texas as the premier place to support and expand the state's small businesses.
